The drawing consists of two views of a mechanical device, likely a container or a small furnace, mounted on a base (2).

The top view is a perspective drawing showing a rectangular frame with diagonal bracing (1). A hinged lid (6) is attached to the top. The frame is supported by a base (2).

The bottom view is a cross-sectional drawing showing the internal structure. It features a frame (17) with horizontal slats (22). The device is mounted on a base (2). The cross-section reveals the internal components, including the slats and the frame structure.
